REPORT ON MEDIA DOCUMENTATION SERVICES

2026

Inclusive Digital Empowerment for Youths with Disabilities Project

Submitted to:

The Ability First Tech Hub

Project Sponsor:

Plan International

Introduction

Brandor Creative Agency was engaged by The Ability First Tech Hub to provide comprehensive media documentation services for the Inclusive Digital Empowerment for Youths with Disabilities project, sponsored by Plan International.

Our role focused on capturing, documenting, and visually telling the story of the project from inception through execution, ensuring that all key activities, milestones, and participant experiences were professionally recorded and presented.

Key Objective

The primary objectives of our engagement included:

- To professionally document all major project activities through high-quality photography and videography
 - To create compelling visual storytelling materials that reflect the impact of the program
 - To capture participant engagement and experiences
 - To support project visibility through creative media outputs such as flyers
- 

Scope of Work

Inception Meeting Coverage

Brandor Creative Agency covered the project inception meeting through:

- Professional action photography capturing key moments and stakeholder engagement
- High-quality video recordings documenting discussions and interactions

Training Activities Documentation

Throughout the training phase, our team provided full media coverage, including:

- Photography of training sessions, facilitators, and participant engagement
- Videography capturing live training activities and interactions
- Continuous documentation of the program's progress

Participant Interviews

At the conclusion of the training sessions, we conducted interviews with participants to document their experiences, feedback, and the impact of the program.

- Video interviews highlighting personal stories and learning outcomes
- Testimonials showcasing the value of the initiative

Visual Storytelling & Flyers

- As part of enhancing project visibility and storytelling:
- We designed and produced flyers that visually narrate the program's journey
- The materials were developed to communicate impact through images and concise messaging

Approach and Methodology

Our approach combined technical expertise with storytelling to ensure the project was documented effectively:

- Use of professional equipment for high-resolution output
- Real-time coverage to capture authentic moments
- Focus on inclusivity, ensuring participants were represented respectfully and accurately
- Creative direction to align visuals with the project's objectives

Key Achievements

- Successful documentation of all major project phases
- Creation of a comprehensive visual archive of the program
- Effective storytelling that highlights the impact on youths with disabilities
- Delivery of high-quality media assets suitable for reporting, publicity, and future advocacy

Conclusion

Brandor Creative Agency is proud to have partnered with The Ability First Tech Hub on this impactful initiative. The documentation produced not only captures the activities carried out but also reflects the transformative impact of the program on participants. We appreciate the opportunity to contribute to this meaningful project and remain available for future collaborations.
